- **Calicut univesity**
  2016 to 2019
  BCA

- **GMHSS**
  2014 to 2016
  Computer science

PROJECTS

- **IMPLEMENTATION OF SECURE EMAIL SERVICE IN CLOUD COMPUTING USING AWS WORKMAIL**
  Most of the current email systems focus on the protection of email letters by using different cryptographic standards. Amazon WorkMail is one of the secure, managed business email and calendar services with support for existing desktop and mobile email clients. Amazon WorkMail gives users the ability to seamlessly access their email, contacts, and calendars using their web browser through a secure active directory with the help of LDAP and IAM which provides a role based access control.
